Implants, made simple to find.

ClonaDENT manufactures and distributes compatible components for dental implants. Dentists need to match the right part to each case. Fast, and without guesswork.

A modern look, a **usable flow**.

We refreshed ClonaDENT's visual identity and built the user flow from scratch including login and account access, which didn't exist before.

Every detail, **at a glance.**

Each product page shows exactly what a dentist needs to confirm compatibility clearly organized, easy to scan.
